SUMMARY

AI engineer with a mobile background. I build AI systems people actually use: agents, OCR pipelines, speech and language model integrations. At Unimall I automated an e-commerce operation of more than 22 million product records; the OCR integration alone cut operating costs by 40%. I started out as a biologist, and the habit stuck: assumptions get verified by measurement.

EXPERIENCE

AI Engineer · Unimall · Hong Kong (Remote) June 2026 – August 2026

- Built an OCR-based data processing pipeline that cut operating costs by 40%
- Kept 22M+ product records in sync across 3 sales channels with a cronjob and webhook architecture
- Designed and shipped an AI agent that writes product listings from product attributes
- Built an agentic chatbot that automates customer support
- Merged 3 separate admin panels into a single interface

AI Researcher · Envagro · Istanbul (Remote) December 2025 – June 2026

- Benchmarked STT, TTS and LLM models under identical conditions, making model selection measurement-driven
- Designed and built scalable APIs for AI services
- Took model integrations from prototype to production end to end
- Turned research findings into user-facing features with product, engineering and design teams

Freelance React Native FullStack Developer · Appisode · London (Remote) August 2025 – September 2025

- Built new features end to end with React Native and Expo
- Made the app smoother through UI/UX improvements and performance optimization
- Developed AI and payment system integrations
- Set up a GitHub Actions CI/CD pipeline that automates builds and releases

PROJECTS

WeatherApp React Native (Expo) · TypeScript · Skia · Reanimated · Drizzle ORM github.com/Enver-Onur-Cogalan/WeatherApp

A weather app that tells you when to go out; the model that interprets questions runs locally.

Meme File Electron · React · TypeScript · Tailwind CSS · Zustand github.com/Enver-Onur-Cogalan/meme-file

A desktop library for reaction videos: tag clips, find them in a second with full-text search, drag into Discord.

Portfolio Next.js · React · TypeScript · Tailwind CSS · GSAP github.com/Enver-Onur-Cogalan/portfolio

My personal site, including a deliberately LLM-free bilingual chatbot guarded by a 250+ case test set.
